

SILVOSO NEWS

As a result, we are not talking about affecting just a few individuals but the very institutions that touch nations. This is what it is all about. Of course, these are the very systems that satan is defending with every resource available to him. At the same time, we have taken several hits:

1. I am writing this from the waiting room at Stanford hospital where Ruth is being treated for severe internal bleeding and hemorrhaging around her kidneys after a renal artery angioplasty. Over the last week, her blood pressure has soared to almost 200 and then as low as 40 and she has gone in and out of clinical shock twice. She has been rushed by ambulance between our home and two different hospitals three times over the last five days. We are trusting God for miraculous healing and protection for her during this crucial time that she has been preparing to co-host the Argentina conference.

2. Several societal influencers and leaders who were planning on coming to participate in the Argentina conference have experienced similar severe business, health and family crises that literally have come out of nowhere and threatened their attendance.

3. The Harvest Evangelism building was broken into two weeks ago and on the same day we began receiving requests for permission to use our materials from highly destructive individuals posing as Bible-college students. These attempts were both thwarted last minute.

4. Many of our regular financial partners have experienced marked retraction in their personal finances that has compromised their ability to support us at this critical time, creating further challenges.

Despite the frontal nature of these assaults, we take this as confirmation that satan is scrambling to defend his positions, hence the extremely crude tactics we are now seeing.

We are launching a D-day invasion on the enemy's most entrenched positions and he knows it is coming. That is why I ask you today to please increase your prayers for us this month and to come alongside fellow supporters who have also taken hits on our behalf by making a sacrificial investment to show that we are standing together here and here is where it stops.

The Lord of Hosts is re-writing history and this is our opportunity to stand together and fight! Your prayers, e-mails, calls and donations are valuable beyond what you may know, so I ask you to help us today because it will resound into eternity.

Your friends for His kingdom,

Ed and Ruth Silvano

TRANSFORMATION HOT SPOTS ...THINGS ARE HEATING UP

Dear Friend,

I'm sending you this urgent update for you to be aware of several significant transformational "hot spots" this month...and the resistance to it that has surfaced which we need your help to overcome. These are the areas:

1. **INTERNATIONAL INSTITUTE:** In just two weeks, over 400 international participants are converging on Argentina for one of the most important exercises we've ever done. The level of faith and expectation is extremely high. When you see side-by-side, for example, a researcher on his face before God asking for divine insight into curing cancer, HMO executives crying out for revelation for new, life-giving health care systems, and Senators of nations seeking a new vision for government, not for their glory but for God's, you know that you are witnessing history about to be written. The trip date is September 28th to October 5th.

2. **ARGENTINA:** Unprecedented changes are occurring in the political scenery of Argentina. Much more than simply running for election, a number of our associates in the vision for transformation have found favor in some of the highest offices in the land. For example, nearly three years ago, we told you of the spiritual awakening of several key advisors to a central political candidate. That candidate, Mauricio Macri, recently won the Governorship of the city of Buenos Aires, the third most powerful post in the nation. We will be engaging with these "disciples of the kingdom" during our upcoming Institute in Argentina.

3. **BOOKSTORES:** Enclosed you will find a sample excerpt of my latest book *Transformation: Change the Marketplace and You Change the World*, which just arrived in bookstores on September 4th. It documents the fact that anybody from any walk of life who engages in the necessary biblical paradigm shifts will see their living environment radically altered for Christ. The book contains scores of testimonies that demonstrate how it works, from the schoolroom to the boardroom; from apartment complexes to State Houses. You can get your copy today at www.harvestevan.org.
