

# SILVOSO NEWS

based social entrepreneurship. The President and First Lady, along with key Christians in the marketplace, are committed to cultivating an environment of transformation where redemptive approaches to commerce can thrive. We feel that Uganda has unmatched potential to become God's prototype for transformation in Africa. The President and the First Lady will join us in Argentina next Fall (more below).

### WHY GARBAGE IS TRANSFORMING EGYPT:

The last stop is Egypt where, unbeknown to most people, extraordinary things are also taking place. In our website bookstore we offer *El Zabbaleen*, a DVD that documents how a businessman-turned-Coptic priest, Father Saaman, led thousands of garbage collectors to Christ in Cairo and turned what used to be known as *Garbage City* into *God's City*, a place that has trade schools, recycling plants and a church facility for 25,000 people. Above all, multitudes are being saved, creating hope that transformation is there to stay.

We will be ministering to 200 Middle Eastern delegates in private sessions, in addition to 7000 others in meetings open to the public. We feel that the transformation principles God has allowed us to pioneer and the insights into prayer evangelism hold an important key to transformation in this volatile region of the world.

As you can see, Africa, widely tagged as the "Dark Continent" has begun to be viewed as God has always seen it – a "Continent of Light"! What a day to be alive! Tough, difficult, challenging days, but days of victory! My friends, the Gates of Hades shall not prevail against the Church, and the whole earth will indeed be filled with the glory of God. It is written!

**IT IS TIME TO EXPERIENCE TRANSFORMATION FOR YOURSELF:** We have enclosed brochures describing our two upcoming training trips to Argentina and encourage you to consider being part of one of them. If at all possible, bring your family along. A few days in Argentina, receiving impartation and training, will advance the Kingdom of God decades in both your home life and in your area of influence. Please go to [www.harvestevan.org/iint](http://www.harvestevan.org/iint) to see the website brochure and promotional video. It will fill you with hope!

Also on our website are *five new* transformation DVDs. If you liked the first one, you will love these. They document ongoing transformation in schools, government, among elected officials, local congregations and cities. *These DVDs are a must-have to nurture your faith and inspire others, especially the young who need something solid to nurture their dreams!*

Please keep us in your prayers during this season of breakthroughs, and prayerfully invest financially into this ministry of transforming the very systems by which our world operates. The needs are real and strategic. Please, use the reply card, or while you are at our website watching the video, visit the donation page.

We look forward to sending you a God honoring, exciting report upon our return. Thank you for being on the ministry team, God's Team!

## SYSTEMIC TRANSFORMATION HAPPENING IN AFRICA!

Dear Friends:

### Greetings from Africa - Continent of Light!

Because of the divine connections formed with many African leaders during transformation exercises in Uganda, South Africa and Argentina in 2006, we have the privilege of doing something truly historic this month. Beginning in the South African cities of Pretoria and Johannesburg, we will help launch the local chapter of the International Transformation Network (ITN). This is significant because ITN, by God's grace, has fast become a powerful engine for empowering pulpit and marketplace ministers to begin transformation movements all over the world in connection with Harvest Evangelism.

### SOUTH AFRICA: From Apartheid to Apostleship

The church hosting the event is the congregation where the most prominent white citizens in the nation attend. In the past, its denomination used its platform to justify apartheid. But now, having repented, they are taking the point to publicly recognize their brothers of color as peers and partners. The church leadership asked that we envision, equip and help them deploy their members – which include the most influential marketplace leaders in South Africa – for ministry in the marketplace. Tremendous breakthrough!

### UGANDA: Cultivating Life

Uganda is a nation completely ripe for transformation. Confirming this is the fact that President Museveni and the First Lady will join us for a training seminar and help launch the local ITN chapter. Ruth and I are also the keynote speakers at a gathering of 700 women to celebrate International Women's Day, where some of the most prominent women in the nation will be exposed to the teaching first captured in my book *Women - God's Secret Weapon*. What an opportunity!

We are traveling with several Harvest and ITN associates who will visit the district in Uganda that the First Lady represents in Parliament – one of the poorest in the land. Their assignment: to find the point of inception for Kingdom enterprises to develop a prototype for the elimination of systemic poverty through biblically

**"MAMA JANET" Museveni, First Lady of Uganda, shared with participants at the International Institute in Argentina about her hopes and dreams for a spiritually and physically transformed Uganda.**
